ABOUT US

EDICAR PLASTICOS was established with an accumulated experience of more than 30 years in the construction and waterproofing sector. In the last 15 years we focused on the swimming pool industry through our brand **CEFIL POOL**, being today the only specialized producer of reinforced PVC membrane in Europe.

CEFIL POOL products, are adaptable to any type of swimming pool, commercial, public or residential, and being applicable to any surface such metal, concrete, wood or monobloc structure pools, guaranteeing a minimum waterproofing of 10 years.

Our reinforced membrane is manufactured in our facilities of Vitoria-Gasteiz (SPAIN), where we are able to produce the complete product without any outer process, complying with all the requirements according to European Standard UNE EN15836-2 applicable to this type of material.

From our place in the north of Spain, where we produce and we have our own logistics platform, we are nowadays delivering to all continents, having active customers in more than 45 countries.

Join us, and become our partner!

More than 30 year experience in swimming pool products

our designs**

COLLECTIONS

For the coming year 2026, **EDICAR PLASTICOS** is pleased to reinforce and strengthen our large-format tile designs, being **CEFIL POOL** one of the main recognised actors in this range, offering a wide variety of designs, tonalities and different tile distributions.

Our latest arrival **VICTORIA Collection** brings 5 minimalist designs, which are aligned with interior design and latest architecture trends, and for the 2026 season, will propose a more realistic and consistent texture, with high slip resistance increasing the sense of safety, and enhancing the details of the pattern. The result of this improvement will turn into a better integration and a significant increase of realism.

This improvement will also be implemented in our **KERAMIK Collection**, with 4 large-format porcelain designs, which have already caused a sensation in the market in recent years, being one of our best sellers.

Additionally, our **ONYX Collection**, for lovers of concrete look-a-like and continuous surfaces, will also bring a new texture offering a more elegant and delicate finish, without losing any of its maximum anti-slip properties.

On the other hand, for these three specific collections, the warranty period will be extended to a total of **15 years for watertightness** and **3 years for colour warranty**, as a result of our continuous R&D process, and answering the highest quality demands required by the market.

We continue to maintain our **NATURE Collection**, with its established designs that include both, tile and continuous designs, for those seeking an integrable design that aligns with the elements of nature.

Finally, we offer the traditional solid colours and classic patterns included in the **PASSION Collection** (3D anti-slip), as well as the **CLASSIC Collection**, presented in this case in two widths (1.65 and 2.05 m) to facilitate large-scale jobs and public projects.

Each and every one of our collections is made with 100% virgin material, formulated with premium raw materials and adhering to the highest quality standards required by European standard **UNE-EN 15836-2**.

**We are specialized in
TILE Design
reinforced membranes**
